Suitable Hanging Device

This year, for security and practicality, we are asking exhibitors to follow our guidance for a suitable hanging device. Please use one of the three methods illustrated below for categories A and B works.

Category A and B work will be stapled or screwed to boards so if your work does not have lugs or mirror plates they will probably not be shown.

Category C works, either framed or unframed, should be tightly strung because they will be hung from a conventional picture rail.
